Notes

1. Existing gate – possibly Georgian but we need to see if we have any further information; to consider if and how we might keep them. Our archaeologist thought they were of low significance.
2. DAC support the removal of the pews but we should consider keeping a few.
3. DAC looking for high quality detailing and finish ... an issue for the architect to address.
4. How important is this? Look at alternative lighting
5. The screen: Mixed views from the DAC as to whether they would support. The Archdeacon would support but others on the DAC may not. This may lead to a mixed support. We should consider other possible options for the screen. Locating in the gallery is not thought to be suitable.
6. We should clearly say that we plan to sell the cottage to fund the project This is not within the jurisdiction of the DAC, nor of the Chancellor.
7. We still need to find a 'home' for Sir Edward Bathurst.
8. Bell ringing chamber: DAC suggested that in the submission we should state how the room is to be used with reference to the protocol and security arrangements. The ringers want assurance of main use and frequency of use for the Sunday school. Worth AC writing to the ringers again.
